Raman Cell for Screen-Printed Electrodes

Ref. RAMANCELL

Cell in black Teflon, with an innovative open- close system (no screws needed) for an easy sensors replacement. Suitable to perform RAMAN experiments with Screen-Printed Electrodes along with a RAMAN Probe (ref. **RAMANPROBE**) available at [DropSens](#).

Cell for Transmission experiments

Ref. TRANSCCELL

Cell in Teflon, with an innovative open-close system where no screws are needed for an easy sensors replacement. Suitable to perform transmission experiments with our transparent Screen-Printed Electrodes along with a Transmission Fiber (ref. **TFIBER-VIS-UV**), Collimator Lens (ref. **CLENS**) and Reflection Probe (ref. **RPROBE-VIS-UV**) also available at [DropSens](#).

Cell for Reflection experiments

Ref. REFLECELL

Cell in Teflon, with an innovative open-close system (no screws needed) and an easy sensors replacement. Suitable to perform reflection experiments with our Screen-Printed Electrodes along with a Reflection Probe (ref. **RPROBE-VIS-UV**) also available at [DropSens](#).

A specific cable connector that act as an interface between the screen-printed electrode and any potentiostat (ref. CAC-P and ref. CAC) or [DropSens](#) potentiostats (ref. CAST) are available.
